Art Unit: 3634

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cheng-Pei. Cheng-Pei discloses a control unit comprising a sprocket wheel 3, a chain guard housing 7, a sprocket support 1, a wrap spring 4, a splined bush 5, a center pin 6 having fins 62,621. Cheng-Pei further discloses a stopper element 73 and ratchet wheel 2 which fully responds to the claimed first and second engagement features.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cheng-Pei in view of Nijs. While Cheng-Pei does not disclose the wrap spring as having a non-circular cross section, Nijs discloses a wrap spring 18 which has a non-circular cross section, wherein, to incorporate this teaching into the wrap spring of Cheng-Pei so as to obtain the advantages of a wrap spring with a non-circular cross section would have been obvious to one of ordinary skill in the art.

3. Claims 1-5,7 are allowed.
